Portfolio: obongdevid.github.io

SUMMARY

I build secure, scalable systems: APIs, data pipelines, mobile apps and the cloud infrastructure they run on. I work mainly with TypeScript, NestJS and PostgreSQL, and I am solution oriented and accountable for outcomes.

SKILLS

Backend: NestJS, Node.js, TypeScript, Prisma, PostgreSQL, MongoDB
Frontend and mobile: Next.js, Flutter
DevOps and cloud: Docker, Terraform, NGINX, Amazon EC2, CI/CD, Git

EXPERIENCE

Backend / Systems Engineer, Sense Connect | June 2026 - Present
Building the backend for a market intelligence platform that competes with tools like Crunchbase and Briter. I design the pipelines that gather business signals from multiple sources, verify and classify them for accuracy, and turn them into trustworthy intelligence for clients.
Tech: TypeScript, NestJS, Prisma, PostgreSQL

Backend / Systems Engineer (Contract), EshSpeaks LLP | April 2026 - July 2026
Built core backend systems for an editorial publishing platform: content sections, articles, and the infrastructure that keeps publishing fast and easy for the editorial team.
Tech: NestJS, TypeScript, Prisma

Backend & Mobile Developer (Contract), Citadel Nutrition Consult (DietPadi) | January 2026 - March 2026
Built the backend and mobile app for a platform connecting clients with dietitians: appointment booking, personalized diet plans and prescriptions, plus reliable emails and notifications.
Tech: NestJS, TypeScript, PostgreSQL, Flutter, CI/CD

Backend Developer, Coinwise Solution Technologies
Built the backend for a financial platform that manages accounts, transactions and balances, keeping a clear, auditable record of every movement of money. Owned the CQRS architecture, separating write commands from read queries so the system stays consistent, scalable and easy to trace.
Tech: NestJS, TypeScript, CQRS

PROJECTS

DietPadi - dietitian appointments and prescriptions
Website: dietpadi.com | Web app: app.dietpadi.com

EshSpeaks - editorial publishing platform
Live: eshspeaks.netlify.app

Shoreline - ERP console for Shoreline Natural Resources Ltd.
Role-checked, audit-logged operations with passkey sign-in. Demo: shoreline-demo.netlify.app

Coinwise - financial accounts and transactions platform
Auditable ledger of accounts, transactions and balances, built on a CQRS architecture with NestJS.
