

Hi, I am

Favour Mfon.

Full-Stack Software Engineer
building secure & scalable systems

Projects

DietPadi

Backend & Mobile Developer

A dietitian appointment and prescription platform that makes professional nutrition guidance easy to access. Clients book appointments with dietitians, who in turn create personalized diet plans and prescriptions through the platform.

NestJS TypeScript PostgreSQL

Flutter CI/CD

[Website](#) [Web App](#)

EshSpeaks

Backend / Systems Engineer

An editorial publishing platform delivering news and analysis on politics, media and current affairs. I built the systems behind content sections and articles, giving the editorial team a fast, organized way to publish.

NestJS TypeScript Prisma

[Live Site](#)

Shoreline

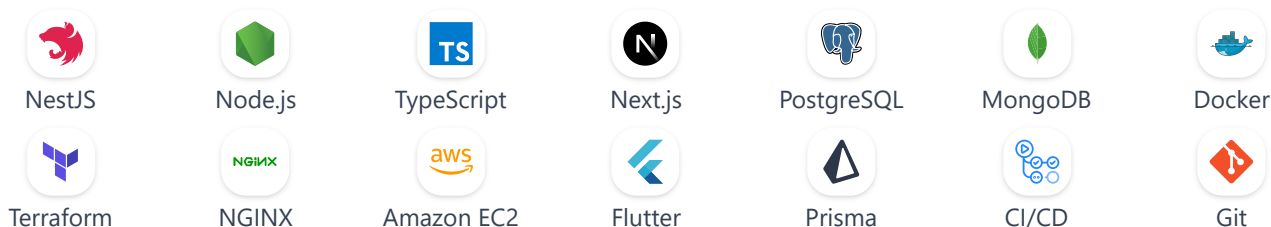

Full-Stack Engineer

An ERP console for Shoreline Natural Resources Ltd. that unifies operations in one place, with role-checked access, audit-logged actions and passkey sign-in so every operation stays accountable end to end.

TypeScript Next.js NestJS

Skills

Working style

Solution Oriented

Accountable for Outcomes

Experience

Backend / Systems Engineer — Sense Connect

June 2026 - **PRESENT**

Building the backend systems for Sense Connect, a market intelligence platform designed to compete with tools like Crunchbase and Briter. I design and build the pipelines that gather business signals from multiple sources, verify and classify them for accuracy, and turn them into a clear, trustworthy intelligence portfolio clients can rely on for decision-making.

Technologies: TypeScript, NestJS, Prisma, PostgreSQL

Backend / Systems Engineer (Contract) — EshSpeaks LLP

April 2026 - July 2026

Built core backend systems for EshSpeaks, an editorial publishing platform delivering news to everyday readers. I developed the systems behind content sections and articles, along with the underlying infrastructure that keeps the platform organized, fast, and easy for the editorial team to manage.

Technologies: NestJS, TypeScript, Prisma

Backend & Mobile Developer (Contract) — Citadel Nutrition Consult (DietPadi)

January 2026 - March 2026

Handled the backend systems and mobile app development for DietPadi, a platform connecting clients with dietitians. I built the features that let clients book appointments with dietitians and allowed dietitians to create personalized diet plans and prescriptions for their clients, and made sure emails and notifications were delivered reliably.

Technologies: NestJS, TypeScript, PostgreSQL, Flutter, CI/CD
